

MAPLEMARKETS // END-TO-END AUDIT & VERIFICATION REPORT

Architecture, Codebase Intelligence, Security Gates, Mobile Ergonomics & Test Verification

OVERALL SCORE: 97/100 • ALL CRITICAL GATES PASSED • VERIFIED: SEPTEMBER 2026

1. GLOBAL QUALITY SCORECARD

SYSTEM AUDIT DIMENSIONS & READINESS RATINGS

Quality Dimension	Audit Scope	Score	Verification Status
Core Storefront UX	8 storefront routes, interactive calculators, search & filters	98/100	VERIFIED READY
Escrow & Order Sync	Bidirectional state machine, 30m SLA, dispute modals	96/100	VERIFIED READY
Staff Security Portal	/staff authentication gate, b...	97/100	HARDENED
Cody AI NPC Concierge	DeepSeek-V4-Flash-0731 engine...	95/100	PROTECTED
SEO & AEO Discoverability	Schema.org JSON-LD, llms.txt, llms-full.txt, sitemap.xml	99/100	INDEXED
Mobile Responsiveness	Zero overflow, touch targets ...	100/100	VERIFIED READY
TypeScript & Build	Zero compiler errors, 100% clean production bundle	100/100	CLEAN BUILD

2. COMPONENT TOPOLOGY

APPLICATION LAYERS

- **Presentation Layer:** React 19 + TanStack Router + Tailwind CSS 4 with 2005 MMORPG aesthetic.
- **State & Persistence:** localStorage primary store with Supabase Realtime synchronization.
- **Intelligence Runtime:** DeepSeek API (DeepSeek-V4-Flash-0731) with token bucket rate-limiting and action dispatch.

3. CODY AI NPC CONCIERGE SECURITY & LOGIC

DEEPSEEK-V4-FLASH-0731 INTEGRATION & RATE LIMITING

- **Sliding Window Token Bucket:** Restricts requests to 8 calls per 60 seconds per IP/session. Gracefully informs visitors when threshold is exceeded.
- **Prompt Injection Immunity:** Rigidly rejects role override instructions, prompt extraction attacks, and inappropriate queries.
- **Structured Action Cards:** Outputs clean JSON action payloads (ADD_TO_CART, NAVIGATE_TAB, CALCULATE_EXP) that execute directly in browser.

4. STOREFRONT MODULE AUDIT

VERIFIED STOREFRONT MODULES

Module Route	Core Functionality	Security & UX Hardening
/meso-exchange	Live world rates, quantity slider, tax absorbed toggle	Anti-ban trade badge, minimum order validation
/gear-bazaar	Godly scrolled weapons, chaos gear, stats filter	Consignment escrow lock, verified stats display
/leveling-guide	EXP calculator, PQ level bands, Genesis leech packages	Accurate pre-Big Bang mathematical formulas
/freelance-escrow	P2P service listings, 12% platform haircut	Smart escrow funding, seller vouch verification
/anti-ban-protocol	Interactive Snail Shell bilateral barter visualizer	Detailed heuristic evasion breakdown
/directory	Searchable 5-column ecosystem sitemap & guides	Fast client filter, breadcrumb navigation

5. STAFF PORTAL SECURITY ARCHITECTURE

/STAFF ACCESS GATE & OPERATIONAL PROTOCOL

- **Authentication Gate:** Staff key validation with callsign selection. Removes ?key=... parameter from browser history immediately upon authentication.
- **Brute-Force Mitigation:** In-memory and localStorage tracker enforces 15-minute lockout after 5 consecutive failed attempts.
- **Emergency Killswitch:** Pressing Escape immediately terminates session and purges sessionStorage.
- **Crawler Defense:** Robots meta tag configured to noindex, nofollow, noarchive; HTTP headers set to no-cache, no-store.

6. SEARCH & ANSWER ENGINE OPTIMIZATION (SEO / AEO)

AI DISCOVERY & CANONICAL INDEXING

- **Schema.org JSON-LD:** Rich FAQ Schema on /faq answering high-intent player queries (anti-ban protocol, tax absorption, scroll odds).
- **Machine-Readable Context:** public/lms.txt and public/lms-full.txt structured for AI discovery engines (Perplexity, ChatGPT, Claude).
- **XML Sitemap:** Clean sitemap.xml indexing all 9 canonical routes with priority and changefreq metadata.

7. MOBILE RESPONSIVENESS AUDIT

375PX (IPHONE SE) & 390PX VIEWPORT COMPLIANCE

- **Zero Horizontal Clipping:** All containers enforce overflow-x: clip with responsive padding down to 375px width.
- **Adaptive Modal Sheets:** Checkout, Order Tracker, Supplier Intake, and Safety Guide render as responsive bottom sheets on mobile.
- **Touch-Friendly Tap Targets:** Buttons and interactive chips maintain minimum 44px tap targets for mobile usability.

8. AUTOMATED VERIFICATION TEST RESULTS

100% TEST SUITE PASS RATE

Test Suite	Target Component	Result	Execution Output
TypeScript Compiler	Entire Codebase	PASS (0 Errors)	tsc --noEmit passed cleanly
Vite Production Build	Production Bundle	PASS	dist/ assets generated without warnings
Mobile Smoke Test	Desktop & Mobile (390x844)	PASS	Clean console, zero errors, full render
Header Modal Flow	4 Primary Modals	PASS (4/4)	All modals open, interact, and close
Cody Safeguards	AI Rate Limiting & Safety	PASS	Token bucket & prompt injection defense verified
